**SAFETY NOTICES**

**ALARM**

- **Warning**
  - Ensure the power supply is switched off, or that PoE power is disabled, during installation.
  - A failing camera can cause injury. During installation ensure the mount is attached securely to the surface and that the camera is attached securely to the mount.
  - Do not dismantle the device or attempt repairs yourself. Repairs must be done by IndigoVision representatives.
  - Ensure that the power supply conforms to the SELV (Safety Extra Low Voltage) safety level.

- **Caution**
  - Handle the camera with care, supporting the body. Ensure that the main electronics and components are not damaged. Only transport, store and install in suitable environments.
  - For security reasons, you must change the camera’s default username and password. Ensure each camera has a unique IP address.
  - Using the incorrect voltage or two power supplies at the same time can damage the camera. Ensure the correct voltage is used.
  - Do not aim the camera at strong light such as sunlight or electric lighting.
  - Ensure that you install the network cable in a location where it will not be trampled or crushed.
  - Incorrect installation may result in water ingress into the camera. Ensure you install the camera correctly to ensure the unit is watertight.

**Connections**

The camera is fitted with a preterminated cable bundle for easy installation.

---

**AVIS DE SÉCURITÉ**

**Avertissements**

- S’assurer que l’alimentation électrique est déconnectée ou que l’alimentation du PoE est désactivée pendant l’installation.
- Une caméra qui tombe peut entraîner des blessures corporelles. Pendant l’installation, s’assurer que le support est fixé solidement à la surface et que la caméra est fixée solidement au support.
- Ne pas démanteler l’appareil ou tester d’effectuer des réparations par vous-même. Les réparations doivent être effectuées par un représentant IndigoVision.
- S’assurer que l’alimentation électrique correspond au niveau sécuritaire SELV (très basse tension de sécurité).

**Attention**

- Manipuler la caméra avec soin, en soutenant le boîtier. S’assurer que les principaux appareils électroniques et composants ne sont pas endommagés. Ne pas laisser la caméra par le faisceau de câbles. Ne transporte, entreposez et installez que dans des environnements appropriés.
- Pour des raisons de sécurité, vous devez modifier le nom d’utilisateur de la caméra, créé par défaut. S’assurer que chaque caméra dispose d’une adresse IP unique.
- Utiliser la tension appropriée peut endommager la caméra. S’assurer que la tension utilisée est correcte.
- Ne pas viser la caméra vers une lumière forte comme la lumière du soleil ou un éclairage électrique.
- S’assurer d’installer le câble réseau dans un emplacement où il ne sera pas pelé ou endommagé.
- Une installation incorrecte peut entraîner la pénétration d’eau dans la caméra. Assurez-vous d’installer la caméra correctement afin de garantir son étanchéité.

**REGULATORY**

- EN 50130-4
- EN 55024
- EN 61000-3-2
- EN 61000-3-3
- UL 60950-1
- EN 60068-2-1: 2007
- EN 60068-2-2: 2007

**Environment**

- **Temperature**: Operating (AUX, PoE+ or higher): -40°C to +60°C (-40°F to 140°F)
- Cold start (AUX, PoE+ or higher): -20°C (-4°F)
- Operating (PoE): -10°C to +60°C (14°F to 140°F)
- Cold start (PoE): -10°C (14°F)
- Maximum humidity: 95%
1. **POWERING UP THE CAMERA**

The camera can be powered by either an auxiliary power supply or PoE and is compliant with the IEEE 802.3at standard.

The following may be used:
- Power over Ethernet (PoE) switch
- PoE injector/midspan
- Auxiliary power supply
  - 12V DC – Camera has a maximum power usage of 13W (1.08A)

The camera should only be powered from the specified voltage. A suitable power supply can be ordered separately (Part number: High PoE Injector 75W 130176, auxiliary 12V DC power supply 110068).

Although this is a PoE+ camera, it will power on with PoE but may reboot if the camera tries to use more power than is available on PoE. This can happen if advanced analytics are used or if the heaters come on due to the external temperature dropping.

---

2. **CONFIGURING THE CAMERA**

Configure the settings

- By default, the camera uses a DHCP server.
- For more information, refer to the Web Configuration Guide for this camera.

1. Connect the camera to a PC using an Ethernet cable.
2. Navigate to the camera’s default IP address using a web browser and set a secure password.
3. If the default password is required, enter 1234.
4. Enter the default network settings.

<table>
<thead>
<tr>
<th>Default Username</th>
<th>Admin</th>
</tr>
</thead>
<tbody>
<tr>
<td>Default IP Address</td>
<td>10.5.1.10</td>
</tr>
<tr>
<td>Default Subnet Mask</td>
<td>255.0.0.0</td>
</tr>
<tr>
<td>Default Gateway</td>
<td>10.0.0.1</td>
</tr>
</tbody>
</table>

3. Enter the NTP server and port on the Setup > System > General > Date &Time page.
4. Select the video standard for your region using the Video Standard option on the Setup > System > General > General page.
   - Choose PAL for countries with 50Hz power frequency and NTSC for countries with 60Hz power frequency.
5. Enter a new IP address and subnet mask on the Setup > Network > TCP/IP page.

Further configuration

After the IP address has been configured, you can also access the camera’s configuration pages through IndigoVision Control Center.

1. In Setup view, select the camera you want to configure.
2. Select the Configure tab, and enter a valid user name and password if required.

Binary I/O connections

The HD Ultra Bullet Camera has two binary inputs and one binary output. These are connected using the Alarm I/O connections on the camera.

**Binary inputs**

- Inputs are operated by connecting the Input directly to GND.
- Inputs must be configured on the Web Configuration pages to ensure correct behavior.

**Binary output**

- Binary output is solid state open collector output:
  - Max load voltage: 30V DC / 21V AC, 0.5A
  - The binary output is not polarity sensitive and is normally open.
- This can be configured on the web configuration pages.

---

3. **INSTALLATION**

The camera can be installed directly on a suitable hard surface that can support the camera’s weight.

Mounting the camera

1. Fix the installation template in the correct location with the correct orientation for the surface, for example, ceiling or wall.
2. Following the installation template, drill 4 holes in the installation surface for the rawlplugs and, if required, one cable exit hole.
3. Insert the 4 rawlplugs (1) into the holes in the installation surface.
4. Align the base of the camera (3) over the rawlplugs and route the cable bundle accordingly.
5. Insert the screws (2) into the rawlplugs and fasten them firmly.
6. Connect to the cable bundle.
7. Adjust the position of the camera as required by loosening the adjustment screw (5) and tighten.
8. Adjust the sunshade as required by loosening the adjustment screw on sunshade (4) and tighten.

---

4. **OPERATIONS**

**Micro SD card installation**

1. Switch off the camera and disconnect the power.
2. Remove the bottom access hatch (10).
3. Insert the SD card into the SD card slot (8).
4. Replace the bottom access hatch and reconnect the power.

Ensure that the bottom access hatch is securely tightened. A poorly fitted bottom access hatch will impact the IP rating of the camera.

**Monitoring video during installation**

To ensure the camera is aligned correctly you can view the camera picture during installation.

1. Connect the camera to a monitoring device using the supplied BNC Adapter cable connected into the video port (8).
2. Select Setup > System > General > TV Out and set to on.
3. The manual zoom buttons (6) can be used during setup.

**Focus the camera**

To focus the camera, click Setup > Camera > Conditions > Zoom and Focus on the camera’s Configuration page.

---

**Reset to factory defaults**

You can reset the camera settings to factory defaults using the following methods:

**Firmware factory restore**

Click **Full Restore** on the Setup > System > Default page.

**Hardware factory restore**

1. Remove the bottom access hatch and locate the Reset switch (9).
2. Press and hold for 10 seconds.
3. The camera will revert to the default factory settings.
