The IndigoVision Microsoft SQL Server Integration allows alarms and events from any other system using a Microsoft SQL database to be seamlessly combined with IndigoVision’s video security solution, giving complete video and alarm management in a single user interface – Control Center.

Trigger live video, move PTZ cameras, start recordings and send notification emails automatically - helping to dramatically decrease operator response time.

Included support for database query notifications provides highly responsive alarms and actions.

### Key Features

## Microsoft SQL Server Events and IndigoVision Actions Supported

### Examples of Supported Events

- Cardholder access events
- Normal entry
- Fault and tamper
- Burglar alarm
- Holdup/Duress alarm
- Intruder zone events
- Fire zone events
- Vibration zone events
- Personal attack zone events
- Time zone events

### Examples of Supported Actions

- PTZ Camera moves to Preset
- Video from one or more cameras displayed on operator’s PC
- Notification email sent
- Recording of any camera started
- CCTV site map pops up with event source highlighted
- Two way audio connection established so operator can listen and talk to the source of the event
- Relay triggered action initiated e.g. door opens or lights turn on
